Professional experience

I have years of experience in various projects and took leading roles related to all stages of Business Continuity and Disaster Recovery, Information and Physical Security and Construction Management, Colocation programs (third party service selection, tender management, contract management, project management, planning, assessments, remediation activities, design of related services and solutions, implementation).

I have gained international experience during various projects performed in multinational teams for insurance, construction, financial, e-commerce, telecommunication and aviation industries as well as for some of the largest enterprises in EMEA region. Selection of my project experience:

Oil & Gas (Rev '19 over 250 md USD): Business Continuity Project Advisor (SME)

- Directly working with and reporting to EMEIA Business Efficiency Director
- BCM governance, methodology and communication scheme development
- Facilitation of the Business Impact Analysis workshops on site for the businesses, the refineries and the terminals in the countries including GR, AU, CH, ES, PT, FR, LUX, TU, PL, UK
- Evaluation and standartization of the BIA outcomes, visualization via PowerBI, presentation to the top management

Insurance: Business Continuity Management and Disaster Recovery project coordinator

- Conducting joint project with control and direction of EMEIA Corporate Management teams, acquisition of BCP external consultancy service and end to end corporate methodology implementation of the BC Program including HQs and regional entities into project scope, general secretariat of corporate security steering committee. Planning, implementation, monitoring and operational execution of BC and Resiliency Program including gap analysis, BIA, RS, DR, crisis management, test, training, awareness, communication, update and change management plan preparation and continuous communication with all organization.
- Conducting IT infrastructure business process maturity assessment and RFP preparation for Disaster Recovery colocation project. Third party Disaster Recovery center and partner selection.

Insurance: Information and Physical Security Management coordinator

- IAM project: Conducting assessment and create approach for new IA authorization concept and project planning.
- Occupational Health and Safety coordination: OHS outsourcing, contract and compliance management and integration studies, OHS corporate coordination, OHS committee organizations, risk analysis and planning of drills for all organization.
- Corporate Social Responsibility Project: Coordination of preparation the Corporate Social Responsibility Report, collecting environmental data and completing system entries and reporting to internal and external audit teams

Construction Management and Coordination employer representative

- Coordination and management of the construction project for international company's head quarter (8500 m2) and regional (1000 m2) offices as the representative of the employer in the whole process from shell and core design phase to the final delivery by the customer; tender and contract management, accounting transaction follow-up, progress assessment studies, quality audits and reporting to EMEIA corporate management.

Business Continuity Project leader in various industries

- Finance : Conducting BC and IT DR maturity assessment in compliance with current regulations and project implementation, GRC Archer tool improvement in line with the new governance model and BCM methodology.
- War game simulation (BoD BC readiness and crisis management plan test organization).
